MT-LCD

DISPLAY FOR T&A CODES

Black Edition

Product available in Black ABS

The MT-LCD display made in the same design as standard XPR readers provides different information for time and attendance application.

The MT-LCD could be used in combination with our online readers and online EWS controller. The LCD display is ideal for companies and hotel who needs to provide information of time management to the user and the administrator. It can provide the presence of users inside a defined area or a number of available space areas. The display can show T&A codes like shift start/end, breaks, private leave and much more. This information can be displayed at the time of user identification.
