

Key Manager is the new software of the XPR OFFLine solution.

This solution does not need any controller or IP/RS-485 network between the different accesses (including those located in remote sites). Each card reader is a mini standalone controller belonging to a system (up to 65 025 doors per site). The access rights of each user are stored in their cards.

MAIN FEATURES

KEY MANAGER replaces both softwares PROA MS and PROH, as it is a more complete software.

Access rights

This function allows to create user groups that will have the same access to the same doors at the same time.

Reports

Reports for Events, Cards, User List, System Logs.

ID card customization

With the KEY MANAGER software you can personalize your Smart Mifare cards with the picture, the name and the department of the card user. You can also add the logotype of the company and some extra texts.

User credit management

Management of the users credit that will be deducted from their cards anytime they use them on a credit reader.

High security

You can use Mifare Desfire cards with this software, which provide higher security to your installation.

Easy installation

With the Key Manager software is very easy to install different devices, such as the PxP products.

Free software and updates

You can download the Key Manager software for free from our website: <http://www.xprgroup.com>

OTHER FEATURES

- **Intuitive interface:** Very easy to use and understand.
- **Programming card types:** Mifare Desfire EV1, EV2 and EV3.
- **Access card types:** Mifare Classic, Mifare Desfire EV1, V2 and EV3.
- ***Devices:** DINMTPX-MF-SA, MTPX-MF-SA, PXP-CY-MF Cylinders, and PXP-CL-MF Cabinet Lock.
- **Desktop reader:** PROX-USB

* HL1000-MF MIFARE Locks is not compatible with KEY MANAGER.

Readers events memory	648	
PxP Events memory	423	

Key Manager Programming Kit

A kit of Mifare cards is necessary for the system set-up, configuration and use.

Ref.: KM-PROGRAMMING-KIT

PxP range

The new PxP range, which is composed by cylinders and cabinet lock are compatible only with KEY MANAGER (not with former softwares PROA-MS or PROH MS).

KEY MANAGER is a very complete software. Some of the configurable options enables it to play role as PROH MS or PROA MS (former OFFLine/Hotel softwares). There are two options:

- 1. Database: MS SQL, Access.

SQL options enables more workstations for system and users management with one central database. Suitable for hotels, campus and other sites with multiply management points.

Access database is suitable for small, one PC solutions. However, using repository sharing, multipoint management is possible (with some restrictions).

- 2. Mode: Key Manager, Access

Key Manager mode is enabling the full system configuration with limit of 250 buildings, each with 255 floors and each floor with 255 rooms. Also this system can have "public" doors organized in up to 255 groups.

Access control mode is simpler solution with 255 door groups.

Readers configuration done by setup card (1) and firmware update done by Micro USB cable (2)

The configuration of the readers are done by creating the Setup card. The firmware update of the reader is done by USB connection.

All product specifications are subject to change without notice.
